

Arkansas Hospice will cover all medications that are consistent with the patient's Hospice Plan of Care and are related to the terminal condition. Inclusion of a medication on this list does not imply automatic coverage. This preferred drug list (PDL) is designed to serve as a reference guide to assist in the selection of cost-effective pharmaceutical products. It is not intended to be a substitute for clinical knowledge and judgment. In all cases, the prescriber is expected to select appropriate drug therapy for the individual patient and provide high quality health care.

Drugs not on this list will require prior authorization (See Page 3)
